

North Shore 22

Why Buy A Boat When You Can Build One?

Proudly produced by Grey Barn Boatworks, the North Shore 22 is constructed from the hull formerly known as the Sisu 22. Designed by Royal Lowell, this New England style hull is often imitated due to its proven seaworthy characteristics. To ensure a truly custom craft, the production of these "MiniYachts" is limited annually.

Through collaboration with the owner from the beginning of the project, a truly individual and distinctive boat is attained. The attention given to quality, detail and craftsmanship is unsurpassed. The quiet acknowledgements at the club and inquiries on both the dock and the water will leave even the most modest yachtsman feeling proud of his new "MiniYacht".

All welded railings to ensure a secure hold.

Cleats pull up for clear gunwale passage.

Console tilts forward with ease to gain complete access of engine.

The height of your helm can initially be adjusted to fit you.

Custom helm seat made to your specifications.

Built in head, with a macerator, holding tank, Y valve, and deck pump out.

Options etc:

Please inquire about our options list, as we offer a wide range of hand crafted options rarely found on other manufacturers products. For example, the choices of of a fuel efficient inboard Yanmar diesel or a four stroke Suzuki outboard, AwlGrip color selection, custom cushions and many teak additions mentioning only a few. These popular options, among others, are yet another reason why we are considered builders of the finest "MiniYachts".

It is important to mention that among our extensive list of standard features, a dual axle galvanized roller trailer is paired with every "MiniYacht"; enabling you to transport your craft to your favorite vacation spot, or a secluded harbor you've only read about. In the unfortunate occurrence of unsettling weather, having your own trailer makes for an effortless and economical haul-out until the storm passes, not to mention it can save you thousands of dollars annually in off season storage costs.

"We welcome you the pleasures this boat can bring."

Grey Barn Boatworks is a new name for a seasoned business. In 2006, after selling North Shore Boat Works, a family owned business of over 40 years, Grey Barn Boatworks opened its doors in Newton, New Hampshire. From the beginning, North Shore Boat Works always had a boat building project underway. These boats ranged from the many wooden boats to the one of a kind fiberglass "MiniYachts" currently built.

The Sisu mold was purchased in Maine while searching for a thirty six foot hull to finish for a customer. Construction of the first North Shore 22 began shortly after. The new generation at Grey Barn Boatworks is putting its twenty eight years of experience to work for you. Grey Barn Boatworks is solely dedicated to producing quality craft.

In the woods of Southern New Hampshire, clients enjoy a serene setting in which to make choices and decisions while their custom "MiniYacht" is being constructed.
